Index to

The Welding Journal

Volume 29—1950

Published by the American Welding Society, 33 West 39th Street, New York 18, N.Y.

a. The Welding Journal

This part includes general technical articles, papers presented before Section and National meetings, articles for the practical welder and designer, news, biographical items, current welding literature and advertising.

Page Allocation by Issues

January	1– 90	July	527– 622
February	91–186	August	623– 702
March	187–276	September	703– 830
April	277–364	October	831– 950
May	365–446	November	951–1046
June	447–526	December	1047–1142

b. Welding Research Supplement

This section includes the reports of the Welding Research Council, critical digests of the literature, reports of the Project Committees and research reports of industry.

Page Allocation by Issues

January	1-s– 48-s	July	313-s–360-s
February	49-s– 96-s	August	361-s–408-s
March	97-s–160-s	September	409-s–496-s
April	161-s–216-s	October	497-s–536-s
May	217-s–264-s	November	537-s–576-s
June	265-s–312-s	December	577-s–624-s

a. THE WELDING JOURNAL
Subject Index

Aircomatic Welding Process—A. Muller, G. J. Gibson and E. H. Roper, 458–482.
Aircraft, Spot and Seam Welding of, Using D.-C. Current—J. H. Cooper, 965–972.
Aircraft Steels, Crack Sensitivity of—A. W. Steinberger, B. J. DeSimone and J. Stoop, 752–764; Discussion—Jay Bland, 1068–1069; Authors' Reply, 1069.
Aircraft Welding, Some Basic Problems in Design for—J. Koziarski and K. B. Gillmore, 709–714.
Aluminum Alloys, Shielded Stud Welding of—Edward Dash, 35–36.
Aluminum Ammonium Nitrate Prilling Tower, Welded—H. N. Hockensmith, 729–732.
Aluminum Pressure Vessels, Inert-Arc Welding—A. J. Hopper, 31–35.
Aluminum, Shielded Arc Welding of—Fritz Albrecht, 542–546.
Aluminum, Welding with Inert Arc D. C.—John W. Mortimer, 879–881.
Automobile Accessory Production Welding—J. Raymond Wirt, 740–744.
Automotive Welding, Inert-Arc—R. H. Bennewitz and F. J. Pilia, 126–136.

Brazing—155–156.
Brazing for Production Economy—C. E. Swift and E. B. Brown, 1089–1093.
Brazing, Operations Mechanized, 903.
Bridge, Welded Deck Girder Highway—Discussion by Gordon Cape, 380–381.
Bridge Welding, Future—A. E. Cibulka, 909–911.
Bridges, Welded—Alois Cibulka, 1098–1099.
Bronze in Production, Gas Welding with—Clinton E. Swift, 646–650.
Bronze Welding—C. H. Wanamaker, 235–237.
Bronze Welding—W. M. White, 52–53.

Cast Iron, Cutting—R. L. Vining, 765–766.
Cast Iron, How to Fusion Weld—F. C. Geibig, 583–587.
Cast Iron Repair—A. J. Beldon, 1001.
Cold Welding, Latest Developments in—William Dubilier, 1077–1081.
Copper Alloy Brazing for Production Economy—C. E. Swift and E. B. Brown, 1089–1093.
Cost, Better Welding at Lower—Lew Gilbert, 855–862.
Cutting and Scarfing of Stainless Steels, Powder Method—C. W. Powell, 308–310.
Cutting Machines, New Developments in Oxyacetylene—W. Begerow and A. H. Yoch, 382–387.

Design of Weldments and Engineering Practice—Anthony K. Pandjiris, 305–308.
Designing Around a Process—R. F. Helmkamp, 887–892.
Designing for Welding—H. W. Pierce, 371–380.
Designing Housings and Covers, 767–768.
Die Castings, Welding of Zinc Base—Roland H. Ogden, 453–457.
Diesel Locomotive Parts, Reclamation of—LaMotte Grover and R. L. Rex, 973–980.
Dissimilar Metals—High-Nickel Alloys, Welding to Other Metals—G. R. Pease and H. B. Bott, 19–26; Discussion—Hallock C. Campbell, 26; Discussion—N. C. Jessen, 241-s–242-s; Authors' Closure, 242-s.
Dissimilar Metals, Variables in Cross-Wire Welding of—I. S. Goodman, 863–875.

Electric Utility Welding in the Shop and Field—David P. O'Connor, 745–751.
Electrode Coverings, Determining Total Water Content in—C. T. Gayley and W. H. Wooding, 629–635.
Electrodes for Mild Steel Welding—F. R. Strate and R. I. Strough, 193–197.
Engineering Education, Welding in—R. S. Green, 311–317; Discussion—F. Koenigsberger, 751, 764.

Farm Tractors, Welding of—J. Leonard Buchholz, 995–1000.
Fatigue of Structural Joints—1949 Adams Lecture—Wilbur M. Wilson, 204–210.
Flame Cutting—James T. Lewis, Jr., 116–120.
Flame Cutting, Tracing Devices for—Raymond O. Fish, 1059–1064.
Flame Hardening, Electronic Control of—Milton Garvin and David Strauchen, 981–985.
Flame Shape Cutting in Steel Warehouse—W. O. Springer, 97–101; Discussion—T. H. Ayling, 101; Discussion—W. Begerow, 102.
Flash Welding Nonferrous Materials—F. L. Brandt, 718–722; Discussion—Charles Bruno, 1087–1088; Discussion—Jerry Martin, 1088; Discussion—C. R. Dixon, 1088.

Galvanized Iron Welding—F. J. Pilia, 491–492.
Guided-Bend Test, Should it Be Modified? Discussion—W. A. Miller, 293–300; Discussion—Perry C. Arnold, 300; Discussion—F. Lang, 300–303; Discussion—Bela Ronay, 303–304.

Hard-Facing Alloys, Hot Hardness of—Howard S. Avery, 552–578.
Hard Facing, Automatic Electric—Turner G. Brashear, Jr., 391–398.

Hard Facing, New Production Applications of—E. C. Hurt, 1082–1086.
Hard Facing of Steam Valve Seats and Disks—Oscar E. Swenson, 1053–1058.
Hardfacing Applications in the Steel Industry—J. J. Barry, 198–203.
Homopolar Generator for Resistance Welding—T. J. Crawford, 211–215.
Heating Electrode, 210.

Inert-Arc Welding, Applications for Helium—M. J. Conway, 533–536.
Inert-Arc Welding in Production—T. E. Piper, 723–728.
Inert-Arc Welding in the Automotive Industry—R. H. Bennewitz and F. J. Pilia, 126–136.
Inert-Arc Welding, Jigs and Fixtures for—H. A. Huff, Jr. and A. N. Kugler, 893–903.
Inert-Arc Welding of Stainless Steel in the Meat Packing Industry—Charles Bonifield, 121–125.
Inert-Gas-Shielded Arc-Welding Aluminum Pressure Vessels—A. J. Hopper, 31–35.
Inert-Gas-Shielded Arc-Welding Operations, Automatic—H. O. Jones, 655–656.
Inert-Gas-Shielded Metal-Arc Welding Process—A. Muller, G. J. Gibson and E. H. Roper, 458–482.
International Institute of Welding—G. Parsloe, 317–320.

Jigs and Fixtures for Inert-Gas Arc Welding—H. A. Huff, Jr. and A. N. Kugler, 893–903.
Locomotive Parts, Reclamation of Diesel—LaMotte Grover and R. L. Rex, 973–980.
Locomotives, Fabrication of Main-Line Road and Switcher—F. T. Perry, 882–886.

Machinery Bases, Ideas for Designing, 231–234.
Machinery Design—Anthony K. Pandjiris, 305–308.
Magnaflux Inspection of Welded Storage Tanks—F. A. Upson, 27–30.
Magnetic Particle Inspection, Flux Densities for—T. E. Hamill, 105–115; Discussion—C. E. Betz, 114–115; Discussion—Carlton H. Hastings, 115; Author's Reply, 115.
Maintenance, Automatic Welding in Steel Mill—William P. Hoffman, 989–994.
Molybdenum, Arc Welding of—I. S. Goodman, 37–44.
Molybdenum, Titanium and Zirconium, 321–322.

Nickel Alloys Welded to Other Metals—G. R. Pease and H. B. Bott, 19–26; Discussion—Hallock C. Campbell, 26; Discussion—N. C. Jessen, 241-s–242-s Authors' Closure, 242-s.

Pipe Cutting, ABC's of—K. M. Schaefer, 323–324.
Pipe Layout, Hints for—H. P. Martin, 661–662.
Pipe Line, Silver Brazed—John B. Ross, 636–639.
Pipe Lines, Construction and Maintenance of—R. D. Smith, 639–642.
Piping, Design and Installation of Large-Diameter Long-Span Welded Pipe—H. Jackson, 957–961.
Piping, Welding High-Pressure, High Temperature—H. J. Irrgang, 876–879.
Plate Fabrication, Heavy—J. B. McCormick, 403–405.
Plate Fabrication Trends—S. V. Williams, 483–487.
Practical Welder and Designer
A Fast Repair Helps the Farmer—L. S. Bowser, 326.
A Hint for Hard Facing—E. H. Frail, 492.
ABC's of Pipe Cutting—K. M. Schaefer, 323–324.
Automatic High-Speed Welding of Small-Diameter Joints, 582.
Automatic Welding for the Transcontinental Hudson River Crossing, 1100–1101.
Brazed Safety Rings Prevent Smashed Fingers, 410.
Brazing, 155–156.
Cable Care, 407.
Cast Iron Repair—A. J. Beldon, 1001.
Close Tolerance of Gas-Welded Assemblies Made Possible by Unusual Rotating Jig, 156.
Clothes Drier—J. A. Warren, 234.
Convenience and Safety Devices for Oil Company Tank Farm—Sam Bickley, 408–409.
Cutting Cast Iron—R. L. Vining, 765–766.
"Deep-Fillet" Technique is Especially Adapted to A.-C. Welding, 153.
Diesel Manifolds Economically Repaired, 1004.
Disappearing Welds—M. L. Powers, 772.
Don't Scrap Automobile Springs—G. R. Clay, 912.
Helium vs. Argon for Welding of Aluminum—A. J. Last, 770–771.
Hints for Cutting Steel—O. J. Swan, 1103.
Hints for Making Corner Welds—L. L. Kelly, 912.
Hints for Pipe Layout—H. P. Martin, 661–662.
Hints for White Metal Welding—E. V. Olson, 904–907.
How Good Are Your Welds?—R. L. Fuller, 774.
How to Bronze Weld—C. H. Wanamaker, 235–237.
How to Clean Tips and Nozzles—J. Villoresi, 911.
How to Fusion Weld Cast Iron—F. C. Geibig, 583–587.
Hydrogen May be Useful—R. F. Wyer, 659–660.
Ideas for Designing Bases, 231–234.
Ideas for Designing Housings and Covers, 767–768.
Internal Expanding Jig for Sheet Metal Stamping, 238–239.
Jig for Scrubber Tanks, 410.
Mechanized Silver Brazing, 405.
Mechanizing Brazing Operations, 903.
More Jobs Repaired by Bronze Welding—W. M. White, 52–53.
The New Metals—Molybdenum, Titanium and Zirconium, 321–322.
New Method of Brazing and Soldering—Charles Boyden, Sr., 907–909.
A Potter's Wheel for the Welder, 1101.
Powder-Cutting, 56.
Production Butt and Flash Welding—H. J. Chamberland, 488–490.
Recondition Banbury Mixers—H. C. Linde, 325–326.
Removing Buttonhead Rivets—M. J. Harris, 51.
Repairing a Jeep Windshield Frame—R. K. Hughes, 1102–1103.
Resistance Welding Hot Air Heating Chamber—H. W. Steiglitz, 580–582.
Safe-Ending Drills and Chisels—F. C. Geibig, 406–407.
Seesaw—H. C. Bell, 771.
Shop Produces Tamping Bars at Low Cost, 660.
Simple Jig Makes Quick Work of Pipe Joints—T. Barron, 322.
Spiral Tubing Produced by "Heliarc" Welding, 769.
Stove and Furnace Repairs—M. S. Casson, 239.
Stud Welding Speeds Steel Production—Robert C. Singleton, 1094–1096.
Tapers for Resistance Welding Electrodes and Holders—W.E. Smith, 1104–1105.
Texas Auto Tunnel, 663–664.
Tips for Easy Inert-Gas-Shielded Arc Welding—A. U. Welch, 664.
Two Ways to Make Sharp Edges When You Hard Face—H. G. Keitz, 409.
Using Barrels as Gas-Cylinder Supports, 766.
Vierendeel Trusses, 491.
Welded Bridges—Alois Cibulka, 1098–1099.
Welded Design of Power Shovels and Buckets—George Bain, 150–153.
Welded Fabrication in Heavy Plate—J. B. McCormick, 403–405.
Welded Open-End Storage and Pipe Rack Sections Make Transferring of Material Easy, 407.
Welded Rail Costs Trimmed, 1002.
Welded Stanchions for the Barn—L. M. Smith, 154–155.
Welded Television Tower and Antenna—Otto R. Bradshaw, 773–774.
Welding Broken Gear Teeth, 1102.
Welding Galvanized Iron—F. J. Pilia, 491–492.
Welding Heavy Castings Restores Power Truck—J. A. Draxler, 55–56.
Welding High-Carbon Steel—Mark W. Sterner, 54–55.
Welding in the Oil Fields, 1002–1004.
Welding on the Farm, 1097–1098.
Welding Tubes, 657–659.
Welding vs. the Future Bridge Engineer—Alois Cibulka, 909–911.
What is Your Welding I. Q.?, 324.
Why and How Metals Break, 768–769.

Pressure Rail Welding, Progress In—Lem Adams, 283–289.
Pressure Vessels, Aluminum, Inert-Arc Welding—A. J. Hopper, 31–35.
Pressure Vessels, Importance of Design—Walter Samans, 7–18.
Pressure Vessels, Multiple Layer Submerged-Arc Welding of—L. C. Stiles and D. H. Curry, 1065–1068.
Procedure Approval Tests—S. S. Katsef, 1070–1077.
Procedures—Better Welding at Lower Cost—Lew Gilbert, 855–862.
Production Gas Welding with Bronze—Clinton E. Swift, 646–650.
Production Welding Techniques, Development of—J. Raymond Wirt, 740–744.

Rail Pressure Welding, Progress In—Lem Adams, 283–289.
Railroad Ore Cars, Rehabilitation of—J. F. Likarish, 837–843.
Railroad Reclamation Plant, Welding at—W. G. Muschler, 733–738.
Railroad Shops, Arc Welding in—E. DiLiberti, 227–230.
Residual Stress, Use of Oxyacetylene Process to Reduce—Harry E. Kennedy, 985–988.
Resistance—Cross-Wire Welding of Dissimilar Metals—I. S. Goodman, 863–875.

Resistance Production Welding, Butt and Flash—H. J. Chamberland, 488–490.
Resistance Welding—Circuit Analysis of Frequency-Changer Welders; Discussion—F. L. Brandt, R. T. Vredenburgh and L. S. Wilkins, 136–137; Discussion—M. S. Shane and Perry L. Nies, 137–138; Discussion—C. N. Clark, 138, 149.
Resistance Welding, Homopolar Generator for—T. J. Crawford, 211–215.
Resistance Welding Hot Air Heating Chamber—H. W. Stieglitz, 580–582.
Resistance Welding of Mild Steel Sheet—W. S. Simmie, 651–654.
Resistance-Welding Tools, Portable—C. H. Davis, Jr., 537–541.
Resistance Welds, A Practical Method for Obtaining Consistent—J. W. Kehoe, 844–855.

Seam and Spot Welding of Aircraft Using D.-C. Current—J. H. Cooper, 965–972.
Shovels and Buckets, Welded Design of—George Bain, 150–153.
Silver-Brazed Pipe Line—John B. Ross, 636–639.
Silver Brazing, Mechanized, 405.
Spot and Seam Welding of Aircraft Using D.-C. Current—J. H. Cooper, 965–972.
Spot Welder Secondary Current Measurement—I. C. McKechnie, 962–964.
Spot Welding, Slope Control and its Effect—Discussion by J. L. Solomon, 578–579.
Stainless Clad Steel, Problems Associated with the Welding of—Discussion by A. L. Schaeffler, 387–390.
Stainless Steel in Meat Packing Industry, Inert-Arc Welding of—Charles Bonifield, 121–125.
Stainless Steels, Powder Cutting and Scarfing of—C. W. Powell, 308–310.
Stainless Steels—Welded to Nickel Alloys—G. R. Pease and H. B. Bott, 19–26; Discussion—Hallock C. Campbell, 26.
Standards, Suggested New Welding—J. F. Lincoln, 715–717.
Stud Welding of Aluminum Alloys—Edward Dash, 35–36.
Stud Welding Speeds Steel Production—Robert C. Singleton, 1094–1096.

Tank Layout—The Icosasphere—J. O. Jackson, 102–104.
Tanks, Importance of Design—Walter Samans, 7–18.
Tanks, Magnaflux Inspection of Welded—F. A. Upson, 27–30.
Titanium, Molybdenum and Zirconium, 321–322.
Training—Continuation of Study of Welding Engineering—Frank W. Scott, 549–551.
Training of a Professional Welding Engineer—John M. Parks, 738–739.
Training of Welding Personnel—Allen C. Tyler, 547–548.
Training, Oxyacetylene Welding in College—Richard C. Wiley, 643–645.
Tunnel, Texas Auto, 663–664.

Weldability—Crack Sensitivity of Aircraft Steels—A. W. Steinberger, B. J. DeSimone and J. Stoop, 752–764.
Welding Generator, Design Features of a—Joseph M. Tyrner and O. Kobel, 399–402.
Welding Machines, Stability Tests of—Charles L. Volff, 290–292.
Welding Metallurgy—O. H. Henry, G. E. Claussen and G. E. Linnert, Chapter V, 45–50; Chapter VI, 139–149; Chapter VII, 216–226.
White Metal, Welding Die Castings—Roland H. Ogden, 453–457.
White Metal Welding, Hints for—E. V. Olson, 904–907.

Zinc Base Alloy Die Castings, Welding—Roland H. Ogden, 453–457.
Zirconium, Molybdenum and Titanium, 321–322.

b. WELDING RESEARCH SUPPLEMENT

Subject Index

Air-Hardening Alloy Steels, Welding—Walter H. Wooding, 552-s–564-s.
Aluminum Alloy 61S-T6 Plate, Tests of Fillet Welds on—R. L. Moore and J. M. Pickett, 224-s–230-s.
Arc Submerged—Energy Distribution in Electric Welding—C. E. Jackson and A. E. Shrubsall, 231-s–241-s; Discussion—Merrill Skolnik, 520-s–521-s.
Arc-Welding Characteristics, Effects of Reduced Atmospheric Pressure on—M. L. Begeman, B. H. Amstead and U. I. Mashruwala, 433-s–440-s.
Austrian Steel Specification, 83-s.

Box Girder, Distribution of Locked-In Stresses in a Large Welded-Steel—John Vasta, 484-s–493-s.
Box Girder Investigations—Correlation with Small Test Specimens—Carl E. Hartbower and William S. Pellini, 348-s–360-s.
Brittle Failure and Size Effect in a Mild Steel—K. J. Stodden and E. P. Klier, 303-s–310-s.

Corrosion of Molybdenum-Bearing Stainless-Steel Weld Metals—Anton L. Schaeffler and R. David Thomas, Jr., 13-s–31-s.

Dissimilar Metals Seam Welded—Ernest F. Nippes, Allan R. Pfluger and Gerald M. Slaughter, 134-s–140-s.

Electrode Coverings, New Procedures for Studying—Jay Bland and Solomon Goldspiel, 522-s–529-s.
Electrodes, Study of Core Wire for—C. B. Voldrich, D. C. Martin and P. J. Rieppel, 265-s–284-s.
Explosion Tests of Welded Joints—G. S. Mikhalapov, 109-s–122-s.

Fatigue, Effect of, on Transition Temperature of Steel—J. M. Lessells and H. E. Jacques, 74-s–83-s.
Fatigue of Spot Welds—Georges Welter, 565-s–576-s.
Fatigue—Spot Welds, Stress Distribution Around—A. O. Bergholm, P. W. Swartz and G. S. Hoell, 217-s–223-s.
Fatigue Strength of Welded Butt Joints, 404-s–408-s.
Firecracker Welding for Stainless—83-s.
Flash-Welding Conditions for Aluminum Alloys, Optimum—E. F. Nippes, W. F. Savage, J. J. McCarthy and P. Patriarca, 497-s–511-s.
Flow and Fracture of Metals, Bibliography—623-s.
The Fracture of Mild Steel—C. F. Tipper, 183-s.

Galvanized Spot Welding, Electrode Tip Life in—Frank W. McBee, Jr., 531-s–535-s.
Galvanized Steel, Electrodes for Spot Welding—Harry B. Spore, 31-s–36-s.

Heat Treatment and Joining Data for Boilers and Pressure Vessel Steels—Committee Report, 622-s–623-s.
High-Frequency Notch-Bend Test—Bela Ronay, 122-s–125-s.

Impact Tests, Axial Tension, of Structural Steels—W. H. Bruckner and N. M. Newmark, 212-s–216-s.
Inert Gases, Determination of Impurities in—R. E. Bowman and C. B. Hartley, 258-s–262-s.

Literature Review—Alloying Elements in Chromium-Nickel Stainless Steels—Helmut Thielsch, 361-s–404-s; Physical Metallurgy of Austenitic Stainless Steels—Helmut Thielsch, 577-s–621-s.
Low Temperatures, Weld Metal Properties at—T. N. Armstrong and W. L. Warner, 295-s–302-s.

Manganese-Molybdenum Steel Deposited as Weld Metal, Transformation of Austenite in—O. O. Miller, F. C. Kristufek and R. H. Aborn, 450-s–458-s.
Metal Spraying—Determination of the Temperature of Sprayed Metal Particles—James E. Cline, Robert T. Thurston and John Wulff, 320-s–322-s, 342-s.
Metal Spraying of High-Temperature Metals and Alloys—Robert T. Thurston and John Wulff, 313-s–319-s.
Molybdenum-Manganese Steel Deposited as Weld Metal, Transformation of Austenite in—O. O. Miller, F. C. Kristufek and R. H. Aborn, 450-s–458-s.
Monel Metal Seam Welded to Steel—Ernest F. Nippes, Allan R. Pfluger and Gerald M. Slaughter, 134-s–140-s.

Navy Tear Test, Further Study of—Noah A. Kahn and Emil A. Imbembo, 84-s–96-s.
Nickel and Nickel Alloys, Spot Welding—Frank G. Harkins, 3-s–12-s.
Nitrogen, Effect of, on Brittle Behavior of Mild Steels—G. H. Enzian and G. J. Salvaggio, 537-s–544-s.
Notch Impact Specimens, Comparative Tests of Different Types, 466-s.
Notch Sensitivity of Welded Steel Plate—L. J. McGeady and R. D. Stout, 243-s–251-s; Discussion—F. J. Winsor, 529-s–530-s.
Notch Toughness, Evaluating—R. W. Vanderbeck and M. Gensamer, 37-s–48-s.

Peening Investigation, Results of—J. Lyell Wilson, 97-s–108-s.
Pressure Vessel Heads, Elastic Theory of, 497-s.
Pressure Vessel Research Committee, Interpretive Report, Fabrication Division—H. C. Boardman, 422-s–432-s.
Pressure Vessel Research—Room Temperature Tensile Tests as an Index of Transition Temperature of Steel Plates—Sadun S. Tör, Robert D. Stout and Bruce G. Johnston, 477-s–483-s.
Pressure Vessel Steels, Heat Treatment and Joining Data for—Committee Report—622-s–623-s.
Pressure Vessels—Design Correlations for Cylindrical Pressure Vessels with Conical or Toriconical Heads—H. L. O'Brien, E. Wetterstrom, M. G. Dykhuizen and R. G. Sturm, 336-s–342-s.
Pressure Vessels, Stresses in "Head-to-Shell" Juncture of—R. G. Sturm, H. L. O'Brien, E. Wetterstrom and J. Evans, 285-s–292-s.
Projection Welding of 0.010 and 0.020-In. Steel Sheet—E. F. Nippes, J. M. Gerken and J. G. Maciora, 441-s–449-s.

Resistance of Contacts, Spreading—W. B. Kouwenhoven and W. T. Sackett, Jr., 512-s–520-s.

Seam Welding Monel Metal to Steel—Ernest F. Nippes, Allan R. Pfluger and Gerald M. Slaughter, 134-s–140-s.
Ship Structure Committee, Work of—Rear Admiral Ellis Reed-Hill, 49-s, 73-s.
Shrinkage Distortion in Welding—W. Spraragen and W. G. Ettinger, 292-s–294-s.
Shrinkage Distortion in Welding—W. Spraragen and W. G. Ettinger, 323-s–335-s.
Spot Weld Stresses Around a Spot Under Static and Cyclic Loads—Georges Welter, 565-s–576-s.
Spot Welding Galvanized Steel, Electrode Tip Life in—Frank W. McBee, Jr., 531-s–535-s.
Spot Welding Galvanized Steel, Electrodes for—Harry B. Spore, 31-s–36-s.

Spot Welding Nickel and Nickel Alloys—Frank G. Harkins, 3-s–12-s.
Spot Welds, Stress Distribution Around—A. O. Bergholm, P. W. Swartz and G. S. Hoell, 217-s–223-s.
Spot Welds, A Torsion Test for, 302-s.
Stainless, Firecracker Welding For—83-s.
Stainless-Steel, Molybdenum-Bearing, Corrosion of Welds—Anton L. Schaeffler and R. David Thomas, Jr., 13-s–31-s.
Stainless Steels, Alloying Elements in Chromium-Nickel—Helmut Thielsch, 361-s–404-s.
Stainless Steels, Impact Tests of Welded Austenitic—J. N. Krivobok and R. D. Thomas, Jr., 493-s–495-s.
Stainless Steels, Physical Metallurgy of Austenitic—Helmut Thielsch, 577-s–621-s.
Stainless Steels, Weld Embrittlement in Chromium—Helmut Thielsch, 126-s–132-s.
Statistical Part in Welding Investigations—Discussion by N. L. Navarre and W. E. Clautice, 262-s–264-s.
Strain Aging in Welding Structural Steel; Discussion—R. E. Lorentz, Jr., 132-s; Discussion—Wells E. Ellis, 133-s; Authors' Reply, 133-s.
Strain-Aging of Arc Welds in Mild Steel—A. E. Flanigan, M. Kaufman and E. M. Emery, 146-s–160-s.
Stress Corrosion Cracking of Mild Steel—Daniel Cubicciotti and William Boyer, 140-s–145-s; Discussion—R. N. Parkins, 458-s.
Structural—Distribution of Locked-In Stresses in a Large Welded-Steel Box Girder—John Vasta, 484-s–493-s.
Structural—Test of H-Section Welded Truss—A. T. Waidelich, 252-s–258-s.

Tension-Impact Test, Micro-Mechanism of Fracture in—W. H. Bruckner, 467-s–476-s.
Tension Impact Tests of Structural Steels—W. H. Bruckner and N. M. Newmark, 212-s–216-s.
Titanium Carbon Alloys, Effect of Welding on the Properties of—E. M. Mahla and R. B. Hitchcock, 544-s–551-s.
Transition Temperature—The Effect of Nitrogen on Brittle Behavior of Mild Steels—G. H. Enzian and G. J. Salvaggio, 537-s–544-s.
Transition Temperature—Evaluating Notch Toughness—R. W. Vanderbeck and M. Gensamer, 37-s–48-s.
Transition Temperature—Evaluation of Tests for Steels for Welded Structure—P. J. Rieppel, R. G. Kline and C. B. Voldrich, 195-s–212-s.
Transition Temperature—Further Study of Navy Tear Test—Noah A. Kahn and Emil A. Imbembo, 84-s–96-s.
Transition Temperature—The Influence of Biaxiality on Notch Brittleness—D. Rosenthal and W. D. Mitchell, 409-s–421-s; Discussion by W. P. Roop, 624-s.
Transition Temperature of Ship Plate in Notch-Tensile Tests—E. M. MacCutcheon, C. L. Pittiglio and R. H. Raring, 184-s–194-s.
Transition Temperature of Steel, Effect of Fatigue on—J. M. Lessells and H. E. Jacques, 74-s–83-s.
Transition Temperature of Steel Plates, Room Temperature Tensile Tests as an Index of—Sadun S. Tör, Robert D. Stout and Bruce G. Johnston, 477-s–483-s.
Transition Temperature—Tensile Tests of Internally Notched Plate Specimens—Samuel T. Carpenter and Wendell P. Roop, 161-s–183-s.
Transition Temperatures—Correlation of Test Results—C. F. Tipper, 50-s–57-s; Discussion—W. S. Pellini and C. E. Hartbower, 57-s–58-s, 73-s.
Transition Temperatures—Distribution of Relative Ductility in Steel Weldments—L. J. Klingler and L. J. Ebert, 59-s–73-s.

Weldability—Air Hardening Alloy Steels—Walter H. Wooding, 552-s–564-s.
Weldability—Correlation of Test Results—C. F. Tipper, 50-s–57-s; Discussion—W. S. Pellini and C. E. Hartbower, 57-s–58-s, 73-s.
Weldability—Direct Explosion of Welded Joints—G. S. Mikhalapov, 109-s–122-s.
Weldability—Distribution of Relative Ductility in Steel Weldments—L. J. Klingler and L. J. Ebert, 59-s–73-s.
Weldability—Effect of Low-Temperature Cooling Rate on the Ductility of Arc Welds in Mild Steel—A. E. Flanigan, S. I. Bocarsky and G. B. McGuire, 459-s–466-s.
Weldability—The Effect of Nitrogen on Brittle Behavior of Mild Steels—G. H. Enzian and G. J. Salvaggio, 537-s–544-s.
Weldability—Evaluating Notch Toughness—R. W. Vanderbeck and M. Gensamer, 37-s–48-s.
Weldability—Evaluation of Tests for Steels for Welded Structures—P. J. Rieppel, R. G. Kline and C. B. Voldrich, 195-s–212-s.
Weldability—Further Study of Navy Tear Test—Noah A. Kahn and Emil A. Imbembo, 84-s–96-s.
Weldability—The Influence of Biaxiality on Notch Brittleness—D. Rosenthal and W. D. Mitchell, 409-s–421-s.
Weldability—Mechanical and Material Variables Affecting Correlation—Carl E. Hartbower and William S. Pellini, 348-s–360-s.
Weldability—Notch Sensitivity of Welded Steel Plate—L. J. McGeady and R. D. Stout, 243-s–251-s; Discussion—F. J. Winsor, 529-s–530-s.
Weldability—Strain-Aging of Arc Welds in Mild Steel—A. E. Flanigan, M. Kaufman and E. M. Emery, 146-s–160-s.
Weldability—Tensile Tests of Internally Notched Plate Specimens—Samuel T. Carpenter and Wendell P. Roop, 161-s–183-s.
Weldability—The Micro-Mechanism of Fracture in the Tension-Impact Test—W. H. Bruckner, 467-s–476-s.
Weldability—Underbead Cracking of Welds Cathodically Charged with Hydrogen—M. W. Mallett and P. J. Rieppel, 343-s–347-s.
Weldcracking and Blue Brittleness, 623-s–624-s.
Welding Research Council Officers—1-s–3-s.

WULFF, JOHN—Metal Spraying of High-Temperature Metals and Alloys, 313-s–319-s.
Determination of the Temperature of Sprayed Metal Particles, 320-s–322-s.

All of the foregoing valued papers would have been in your possession if you were a —

MEMBER of the American Welding Society

JOIN NOW

This Society is recognized as the leading scientific organization in the world devoted to the advancement and interest of welding and the allied processes.

A FEW OF THE BENEFITS IN A. W. S.

The Welding Journal—Monthly; the Society's official organ and the world's leading technical welding magazine, containing articles on all welding processes and their applications, news of the industry, activities of the Society and research reports.

The Welding Handbook—When issued; a complete authority on welding processes, each chapter consisting of authentic information prepared by welding engineering experts carefully selected because of their knowledge and experience. Initial copy furnished to MEMBERS at no extra cost and to ASSOCIATE MEMBERS at special reduced price.

The Section Meetings—Five to eight annually; opportunity afforded you for frank discussion and for interchange of ideas. Become acquainted with others whose problems parallel yours. Many sections provide lecture courses covering metallurgy; modern welding practice; structural welding; design.

The National Meeting—Annually; in fall with National Metal Congress and Exposition at which latest developments in welding equipment, materials and applications are exhibited and demonstrated. An average of seventy-five papers are presented which include the year's outstanding achievements in research and applications.
